Research Briefs

Research Briefs provide focused and timely analysis on key industry topics. These short reports, typically 5-7 pages in length, blend both qualitative and quantitative market analysis from ABI Research's industry experts in their examination of key business issues, competitive dynamics, emerging technologies, regulatory matters, and market demand factors.

Market Data

ABI Research conducts comprehensive supply-side and demand-side research to develop key assumptions for our quantitative industry assessments, and utilizes advanced analytical techniques to develop highly accurate market models. Market Data deliverables include market sizing, market share analysis, and highly segmented, sector-specific market forecasts.

Online Databases

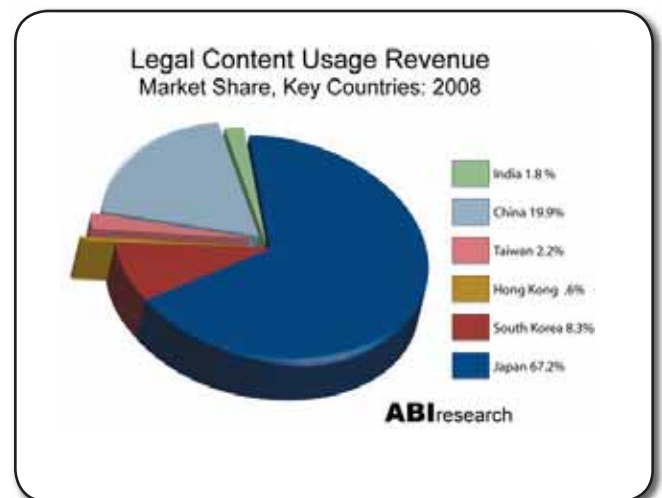

Online Databases provide ABI Research's clients with web-based, real-time access to vast repositories of market information, which are updated on a continuous basis. Users may sort, filter, and search global industry statistics and benchmarks, company profiles and key indicators, supplier contract wins, and product attributes and specifications.

Vendor Matrix

The Vendor Matrix is an analytical tool developed by ABI Research to provide a clear understanding of vendors' positions in specific markets. Vendors are assessed by ABI Research on the important parameters of "innovation" and "implementation" across several industry-specific criteria.

ABI Insights

Emerging technology markets change rapidly, and ABI Research analysts are always on the lookout for the latest developments that could alter the future shape of the industry. ABI Insights are short topical opinion pieces, 1-2 pages in length, that are published frequently to provide a continuous flow of expert perspective, penetrating the hype to find "the story behind the story."
